

Incredible strategy / RPG Shadow Quest is available in Russia/CIS!

St. Petersburg, 12th of December, 2016. Nova Games announces availability of a new title "Shadow Quest: Heroes Story". The game is ready for download in Russia/CIS on the App Store through [this link](#), and on the Google Play [via this link](#).

Shadow Quest is a deep, colorful strategy game with strong RPG elements and a depth of gameplay that rivals modern PC games.

Lead a party of four heroes of various classes forward by using their special abilities. Power up your party in various ways while exploring dungeons in which well-earned rewards await you among enemies and traps. Shadow Quest combines classical RPG elements (leveling up characters, special items, potions, crafting) and the best modern combat mechanics based not just on characters' skills, but also their positional abilities.

Shadow Quest features:

- Deep combat mechanics that rival PC games. Your search for synergy and balance among your heroes will produce impressive results.
- Dozens of diverse heroes. Each hero has a unique personality, set of equipable items, skills, and abilities.
- Three character classes: Tank, Fighter, and Healer. This allows you to find your own combat style and develop your own unique strategy.
- Each chapter of the campaign ends with a boss battle that demands serious effort to win. As a reward, you will get Shade Essence and gain the ability to craft legendary equipment with unique characteristics.
- Countless different items, item crafting, character leveling, and a steady drip of new content.
- Complete quests and get keys that can be used to open treasure chests.

At the moment, the game is on the soft-launch at the App Store/Google Play in the following countries: Russia, Ukraine, Belarus, Kazakhstan, Latvia, Lithuania, Estonia, Uzbekistan, Turkmenistan, Armenia, Azerbaijan, and Kyrgyzstan.
